

Product Summary

Environmentally safe, high specific gravity drilling bead that is coated with a dry lubricant. Turbo-B Beads can be used in place of plastic or glass beads to get a higher crush resistance.

Physical Properties:

Appearance: Dark Colored Bead
Specific Gravity (g/mL): 3.24
Melting Point: >500°F

Wellbore Stability Benefits:

- Reduces torque and drag.
- Lowers risk of differential sticking.
- Compatible with all mud types.
- Reduces casing wear.
- Easily mixed through the hopper.
- Superior strength and crush resistance (56,000 lbs.)

Recommended Treatment

- System Treatment: 6-8 ppb
- Sweeps: 8-12 ppb

Handling and Storage

Proper PPE should be worn while handling this product. Minimize dust exposure. Please review SDS before using.

Packaging

Turbo-B Beads are available in 50 lb. sacks, 50 sacks/pallet.
