

## Product Summary

Turbo-GLA acts as a film forming / barrier lubricant. Turbo-GLA is particularly effective for drilling applications such as deviated wells and those with directional concerns. The lubricating qualities impart friction reduction to enhance rotary and motor drilling as well as logging as casing runs.

## Wellbore Stability Benefits:

- Reduces friction and torque / drag.
- Highly effective at sealing micro-fractured formations while minimizing unstable wellbore situations.
- Temperature stable.
- Non-Abrasive
- Decreases borehole erosion, washouts and key-seating tendencies.

## Physical Properties:

Size: 200 mesh

Appearance: Black Powder

## Handling and Storage

Proper PPE should be worn while handling this product. Please review SDS before using.

## Recommended Treatment

System Treatment: 2-6 ppb to effectively lubricate the wellbore prior to logging or casing runs.

Pills: 10 ppb Turbo-GLA along with 10 ppb First Response or 10 ppb B.F.S. can be applied as a pill or in sweep fashion to reduce mud losses and seal low pressure sands.

## Packaging

Turbo-GLA is available in 50 lb. sacks.
