

Product Summary

Specifically, sized solid lubricant spheres used for minimizing differential sticking and torque/drag issues.

Wellbore Stability Benefits:

- Reduces friction and torque / drag.
- Promotes “ball bearing” effect.
- When spotted as a pill, enhances tripping, logging, casing runs.
- Increases ROP
- Effective in highly deviated wells.

Physical Properties:

Specific Gravity: 2.5-2.6

Appearance: Clear with a slight green tint

Hardness (Mohs Scale): 5.5

Crush Resistance: 28-35K

Handling and Storage

Proper PPE should be worn while handling this product. Please review SDS before using.

Recommended Treatment

Torque/Drag: 5-15 ppb while drilling straight hole.

10-20 ppb while drilling horizontal hole.

Sliding Pills: 5-15 ppb by volume can be added directly to the suction pit or sent in sliding pills to increase ROP.

Packaging

Turbo-Glass Beads are available in 50 lb. sacks.
