

Product Summary

Turbo-Hib H₂S is an organic polymeric amine/triazine blend that reacts and removes hydrogen sulfide from industrial and oilfield waters. It contains no heavy metals. Turbo-Hib H₂S works by reacting with sulfide ions and forming a sulfur-amino reaction product with low toxicity.

Applications:

- Drilling fluids and reservoir pressure maintenance injection systems
- Fracturing Fluids
- Produced water disposal systems
- Petrochemical waste and sewage systems
- Completion Fluids
- Brine storage facilities & oil production water injection systems.

Physical Properties:

Appearance: Dark Red Brown Liquid

Solubility in Oil: Insoluble

Solubility in Water/Glycol: Soluble/Soluble

Handling and Storage

Proper PPE should be worn while handling this product. Please review SDS before using.

Recommended Treatment

Recommended treatment depends on the amount of H₂S present in the water. For most applications 10-100 ppm per ppm of H₂S is required. Treatment can be performed in a scrubbing or washing tower, by adding and mixing to water tanks and by direct addition to water lines and pipelines.

Packaging

Turbo-Hib H₂S is available in 5 gallon pails, 55 gallon drums or 275 gallon totes.
