

Product Summary

Turbo-Sticks SOAP is primarily recommended for use to increase drilling efficiency and life of the drill bits. The slick coating and foaming action increases the efficiency of the drilling process by preventing the clays from sticking and balling up on the drill bit.

Physical Properties:

Appearance: White Tube

pH: 6.5-9.5

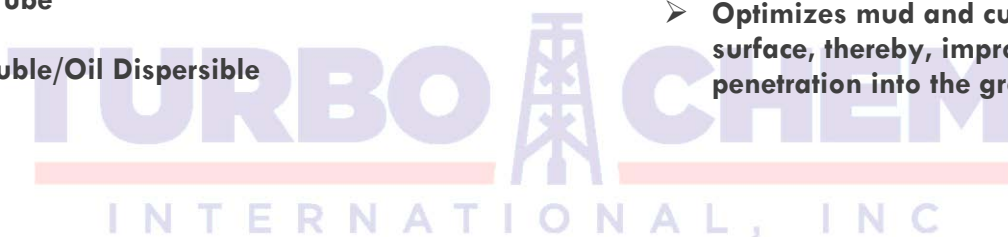

Solubility: Water Soluble/Oil Dispersible

Compatibility:

- Water Base
- Fresh-Water
- Seawater
- Brines

Benefits:

- Turbo-Sticks SOAP effectively foams fresh water and high brines.
- The slick coating and foaming action will also help prevent the jets on the drill bit from plugging.
- Turbo-Sticks SOAP allows the foam to be removed under low pressure conditions.
- Optimizes mud and cutting returns to the surface, thereby, improving drill bit penetration into the ground formations.

Recommended Treatment

Remove disposable outer tube and inject stick into the drill pipe.

Handling and Storage

Proper PPE should be worn while handling this product. Please review SDS before using.

Packaging

Stick size of 1¼X15” available. Shipped in 45 and 100 count cases. 55 gallon open top drums @ 450 count are also available.
